DENTAL

DER FRONTZAHN

- Perfekte Lichtbrechung
- Lebendige Schichtung
- Ideal für Hybrid- und Implantatkonstruktionen
- Plaqueresistent aus Organic Modified Polymer-Network® (OMP-N®)

ENGLISH

THE ANTERIOR

- Perfect light refraction
- Lively looking layers
- Ideal for hybrid and implant constructions
- Plaque resistant, made of Organic Modified Polymer-Network® (OMP-N®)

ITALIANO

DENTE ANTERIORE

- Rifrazione naturale della luce
- Tessitura viva
- Ideale per strutture ibride e sovrastrutture implantari
- Resistenza alla placca data dal Organic Modified Polymer-Network® (OMP-N®)

ESPAÑOL

ANTERIOR

- Perfecta refracción de la luz
- Estratificación viva
- Ideal para construcciones híbridas e construcciones con implantes
- Resistencia a la placa de Organic Modified Polymer-Network® (OMP-N®)

FRANÇAIS

ANTERIEUR

- Réfraction de la lumière parfaite
- Structure de couches vivantes
- Idéal pour prothèses combinées et prothèses sur implants
- Résistante à la plaque, de Organic Modified Polymer-Network® (OMP-N®)

DER SEITENZAHN

- Vollanatomisch, Höckerneigung 25°
- Körperhaft wie ein natürlicher Zahn
- Eindeutige Zentrik für natürliche und künstliche Antagonisten
- Zeitsparendes Handling: basale Form, integrierte Aufstellhilfe, Preventive Shift Groove® (PSG®)
- Auch aus Highly Modified Polymer-Network® (HMP-N®) für die Kombi- und Hybrid-Prothetik

THE POSTERIOR

- Fully anatomical, cusp angle 25°
- Full bodied like a natural tooth
- Clear centric for natural and artificial antagonists
- Time-saving handling: basal shaped, integrated set-up aid Preventive Shift Groove® (PSG®)
- Also in Highly Modified Polymer-Network® (HMP-N®) for partial, complete and hybrid denture prosthetics

DENTE POSTERIORE

- Anatomico, inclinazione delle cuspidi 25°
- Funzionalità naturale
- Relazione di centrica univoca per antagonisti naturali o artificiali
- Risparmio di tempo: forma o profilo basale, ausilio di posizionamento sagittale integrato, Preventive Shift Groove® (PSG®)
- Composto da Highly Modified Polymer-Network® (HMP-N®) per protesi combinata e protesi ibrida

POSTERIOR

- Anatómico, inclinación cuspeida 25°
- Formas dentales naturales, según el cuerpo
- Posición céntrica clara para los antagonistas artificiales y naturales
- Ahorro de tiempo en el manejo: forma basal, auxiliar basal integrado, Preventive Shift Groove® (PSG®)
- También de Highly Modified Polymer-Network® (HMP-N®)

POSTERIEUR

- Anatomique, inclinaison des cuspides 25°
- Corporelle comme une dent naturelle
- Centrique évidente pour antagonistes naturels et artificiels
- Handling rapide : forme basale, aide au montage sagittal intégré, Rainure basale brevetée, Preventive Shift Groove® (PSG®)
- Egalement de Highly Modified Polymer-Network® (HMP-N®)
