Description of first aid measures

General:

Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.

Inhalation:

If having difficulty breathing, contact emergency personnel immediately. Supply fresh air and be sure to call for a doctor. In case of unconsciousness, place patient securely on side position for transportation.

Skin: Remove contaminated clothing. Wash clothing before reuse. Wash with soap and water. If irritation occurs consult a doctor. Immediately wash with water and soap and rinse thoroughly.

Eyes: Hold eyelids apart and flush eyes with plenty of water for at least 20 minutes. Seek medical treatment. Rinse opened eye for several minutes under running water. Then consult doctor.

Ingestion: Induce vomiting and call for medical help. Never give anything by mouth to an unconscious person. Immediately call a doctor.

Most important symptoms and effects, both acute and delayed: No further relevant information available.

Information for doctor: This product contains sodium carbonate at low concentrations. While no adverse complications are expected, consider endoscopy in all suspected cases of poisoning. Perform blood analysis to determine if dehydration, acidosis, or other electrolyte imbalances occurred.

Indication of any immediate medical attention and special treatment needed: No further relevant information available.

No further data; see Section 7.

Control Parameters**Components with occupational exposure limits:**

Federal guidelines suggest treating the ingredient in this product as a nuisance dust, as no product specific guidelines have been issued for exposure.

Particulates not otherwise regulated: OSHA (PEL/TWA): 15 mg/m³ (total dust); 5 mg/m³ (resp fraction)

Additional Information: The lists that were valid during the creation were used as basis.

Exposure Controls**Personal Protective Equipment:****General Protective and Hygienic Measures:**

Keep away from tobacco products. Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing. Wash hands before breaks and at the end of work. Avoid contact with the skin. Avoid contact with the eyes and skin.

Breathing Equipment: Not Required.

Protection of Hands:**Protective Gloves**

The glove material has to be impermeable and resistant to the product/the substance/the preparation. Due to missing tests no recommendation to the glove material can be given for the product/the preparation/the chemical mixture. Select glove material based on penetration times, rates of diffusion and degradation.

Material Gloves: The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application.

Penetration time of the glove material: The exact break-through time has to be determined and observed by the manufacturer of the protective gloves.

Eye Protection: Have a safety shower and eyewash fountain readily available in the immediate work area. Tightly sealed goggles.

Body protection: Protective work clothing.
